Professional Summary

Software Developer experienced in building **AI-powered** and **full-stack applications** using **React**, **Node.js**, and **REST APIs**. Developed **LLM-integrated** solutions with **Retrieval-Augmented Generation (RAG)**, **semantic retrieval**, and intelligent document processing while building scalable backend systems with **Redis**, **Docker**, and **Socket.io**. Strong foundation in problem-solving, and scalable software development.

Skills Summary

Languages: JavaScript, C++, SQL
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, MongoDB, REST APIs, Socket.io, WebRTC, JWT, PostgreSQL, MySQL
Developer Tools: Redis, Docker, Git, AWS, Firebase, MVC Pattern, Cache-Aside Strategy

Achievements & Certifications

- **1st Place** – Problem Solving Competition, REVA University (2024): Solved algorithmic challenges under time constraints (**top among 100+ participants**).
- **2nd Place** – VibeX Hackathon, NMIT (2025): Built a **full-stack application** within **24 hours** using Vibe Code.
- **2nd Place** – Coding Competition, REVA University (2025): Developed a **full-stack solution** under strict time constraints.
- **2nd Place** – Algo Rhythm, GCEM (2026): Solved high-speed algorithmic challenges (**top among 50+ participants**).

Projects

Rapid Chat | React.js, Node.js, Express.js, MongoDB, Redis, Docker, Socket.IO Live | GitHub

- Engineered a scalable **real-time collaboration platform** integrating **RAG, LLMs, vector embeddings, semantic chunking, NLP-based document querying, and contextual retrieval**, enabling AI-powered interactions with **live streams, video calls, PDFs, and chat data** in shared group environments.
- Designed and deployed real-time communication using **Socket.IO** and **WebRTC**, supporting **20+ concurrent users** in multi-user video calls and synchronized group streaming.
- Implemented a **hybrid RAG pipeline** with **timestamp-aware retrieval** for live transcripts and documents, enabling fine-grained contextual question answering.
- Architected the backend using the **MVC pattern** with **Redis cache-aside caching** and **TTL-based invalidation**, reducing API response time by **45%** while minimizing redundant **LLM inference**.

Experience

Zyvora Innovations Jul 2026 – Present
Full Stack Developer Intern *Bengaluru, Karnataka*

- Built and developed a **Node.js/Express** backend application for **team coordination**, designing APIs and implementing core server-side functionality for application workflows.
- Owned **full-stack feature development** across **React.js, Node.js, and Express.js**, integrating REST APIs and connecting frontend components with backend services.
- Contributed to the development of **production-ready features** through API integration, backend development, frontend implementation, debugging, and cross-functional coordination with the development team.

Specular Graphics Private Limited Dec 2025 – Jan 2026
Full Stack Developer Intern *Bengaluru, Karnataka*

- Optimized backend API performance by reducing average response time by **35%** and resolved **12+ production issues** in a **Node.js/Express** system, improving overall reliability and throughput.
- Developed and deployed a responsive production-ready frontend using **React**, **GSAP**, and **Tailwind CSS**, achieving a **40% faster load time** and increasing user engagement by **25%**.
- Collaborated on feature enhancements for an internal client-facing platform, accelerating deployment cycles by **30%** and receiving positive feedback from **95% of internal stakeholders**.

Education

REVA University 2023 – 2027 (Expected)
B.Tech in Computer Science and Engineering *Bengaluru, Karnataka*

Vidya Soudha PU College March 2023
Higher Secondary (12th) – 80.16% *Bengaluru, Karnataka*

Apollo High School July 2021
Secondary (10th) – 89.28% *Bengaluru, Karnataka*
